✕ **Tropical Cyclone Information**

Kochi Local Meteorological Observatory
Issued on 2019-09-23 04:50

A typhoon has occurred. Check the typhoon information which will be issued from now on.

(For the following, information from the Japan Meteorological Agency is distributed using translation software.)

2019 Kochi Prefecture Weather Information Regarding Typhoon No. 17

In Kochi Prefecture, please be aware of strong winds until the evening of the 23rd, high waves until the early evening of the 23rd, and heavy rain and lightning strikes until before noon on the 23rd.

The large Typhoon No. 17 was about 110 kilometers west of Matsue City at 4:00 on the 23rd, and was moving northeast at a speed of about 45 kilometers per hour. The central pressure is 985 hectopascals, the maximum wind speed is 30 meters, the maximum instantaneous wind speed is 40 meters, and within a radius of 170 kilometers from the center, the wind speed is over 25 meters.
The typhoon is moving away from the Shikoku region, but the atmospheric conditions are expected to continue to be unstable until noon on the 23rd due to the effects of moist air.

[Actual rain]
